Dear Mr. Snow:-

Please don't renew or restore that old nightmare, the Peripheral Canal, which California voters wisely rejected in 1982! The current draft plan seems to be "what the good doctor ordered"...a restoratoin of the dying estuary which supplies water to most Californians and the imperiled species habitat. If this plan is adopted, it would, hopefully, restore thriving wetlands, salmon runs and the largest inland estuary in the West.

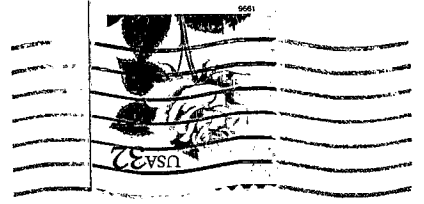

Just say no to developers and agribusiness.

Thank you in advance for voting with high-quality water and wildlife and all that this project entails, which will be beneficial for all Calfironians.
